

## Automated Brochure Packing – In-line with Perfect Binders

The new VA.01 operates in-line with perfect binders to automatically pack books into telescopic boxes.

### VA.01 Packing Machine

- ▲ Book sizes A4 and 2 x A5
- ▲ Packing in telescopic containers – box and lid
- ▲ Output 500 piles per hour

**REVOLUTION**

## VA.01 Packing Machine

The new VA.01 packing machine operates in-line with perfect binders to automatically pack books into telescopic containers – box and lid. Feeding of the piles is done by a special conveyor which prevents single books from sliding out of position.

In the first station of VA.01 the box part of the telescopic container is opened and drawn over the pile of brochures. The filled box is now turned over. In the third station the lid is drawn over the pile. Now the pile of brochures is ready packed for either manual or automated labeling and palletizing.

### Benefits

- ▲ For the first time a continuous workflow from perfect binding to the pallet ready for shipment
- ▲ Increases the efficiency of perfect binders
- ▲ Provides constant and calculable output in the packing process
- ▲ Facilitates work for the staff by automation
- ▲ Resolves the bottleneck capacity in packing behind perfect binders

### Functions

- ▲ Book sizes A4 and 2 x A5
- ▲ Pile height up to 150 mm
- ▲ Packing in telescopic containers – box and lid
- ▲ In-line packing with perfect binders
- ▲ Output 500 piles per hour
